**ΠΑΝΕΠΙΣΤΗΜΙΟ ΑΘΗΝΩΝ**
**Τμήμα Πληροφορικής & Τηλεπικοινωνιών**
**Μεταγλωτηστές – Spiglet Optimizer**

1) General: Open the scr folder and run the makefile make all and make run. Put the files that want to be optimized in the folder SP_files. In the Datalog folder are found the files with the Rules and Queries. In addition, the Facts folder which will contain after the execution the Facts of the spiglet files. The output file contains the results of the analyses. IMPORTANT Put the files to be analyzed in the file SP_files and run the program with the name of the archives as a definition e.g. Factorial.sp should be put and the extension.sp
